- 2015/2018 Standard: 77 FR 32308 (implemented in two phases)

**\*\*Dates shown here are effective dates, not issued.**

**Note:** Calculations for energy and water use assume a tub capacity of 3.46 cubic feet for all washers (AHAM, Trends in Energy Efficiency 2010). 295 cycles/year are assumed for all calculations per DOE's 2012 final test procedure rule [77 FR 13888].
